

**Beyond Reach** is a game dealing in hidden information, so it will be harder to stop a line of thought you may be uncomfortable with during play.

**Before you begin**, talk with your playing partner about topics you want to stay off limits.

**During play** if you have an idea for something in a letter that could be a potentially triggering subject run it by your playing partner to see if they are ok with it!

**Beyond Reach** is intended to tell a sad story and to surprise you by how your letters weave together or stand starkly apart, but the safety of the players should always be a priority!
