In Another Life

BY LAUREN BRYANT-MONK

The Introduction

Spend some time with the other players creating your lovers in the past and present. This can be as detailed or as sparse as you'd like.

This Life

Who are they?
Where are they?
What do they want?
What were they doing yesterday?

Past Life

Who were they?
Where were they?
What did they want?
What eventually drove them apart?

Bonds

Start with 0 bonds. They will increase as you remember

The Story

Play out the story of your lovers meeting again by following the scene prompts. Every time you try to remember something, describe the memory, what triggered it and then roll To Remember. Describe how you react to this memory and how it changes your relationship in this life. Once all players have recalled at least one memory, you can move forward to the next scene

Scene Prompts

1. Meeting for the First? Time
2. We just keep running into each other!
3. What has changed and what stays the same
4. Past Feelings conflict with Present Desires.
5. What is most important
6. How do we move forward from here?

To Remember

When you remember something about your past life with a lover, roll+bonds

ON A 12 OR HIGHER

It is a memory of a significant moment in your past relationship. Add +1 bond

ON A 10 OR 11

You all remember in detail. Add +1 forward

ON A 7 - 9

Only the person who rolled remembers it clearly

ON A 6 OR LOWER

None of you can remember exactly what happened but you all remember how it made you feel.

If this is your 5th time rolling this, add +1 bonds

The End

Once you have played through all the scenes, narrate an epilogue for your characters in this life. If you're interested, you can always see what happens to them in the life after this one.
