Instructions:

All patterns were made with **5mm low density EVA foam** and glued with **contact cement**.

Edit the shapes and add more layers or foam clay for even more variations!

Some lines are marked with an arrow. These lines must be cut at an angle. Tilt either inside or outside your shape based on this drawing:

How to scale and print these patterns

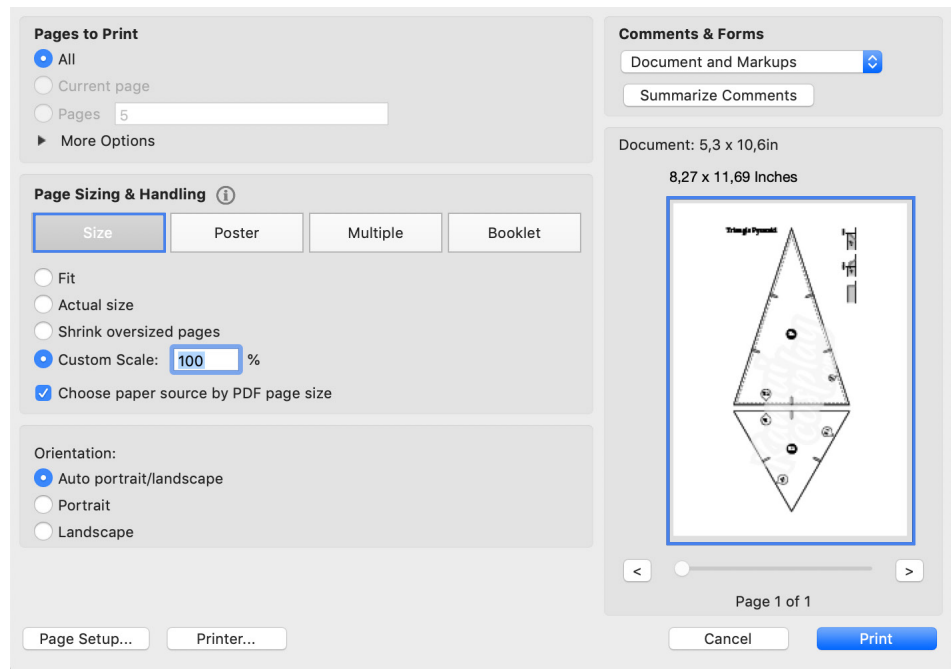

How to print:

To properly scale and print these pattern I recommend using the free [Adobe Acrobat Reader](#).

Now open the pattern collection and select **file -> print** to see the printing options.

Here you can click on **“Actual Size”** and print them at **100%**.

You can also click on **“Custom Scale”** and scale them up or down as you see fit. To the right you will see a preview of your print page.

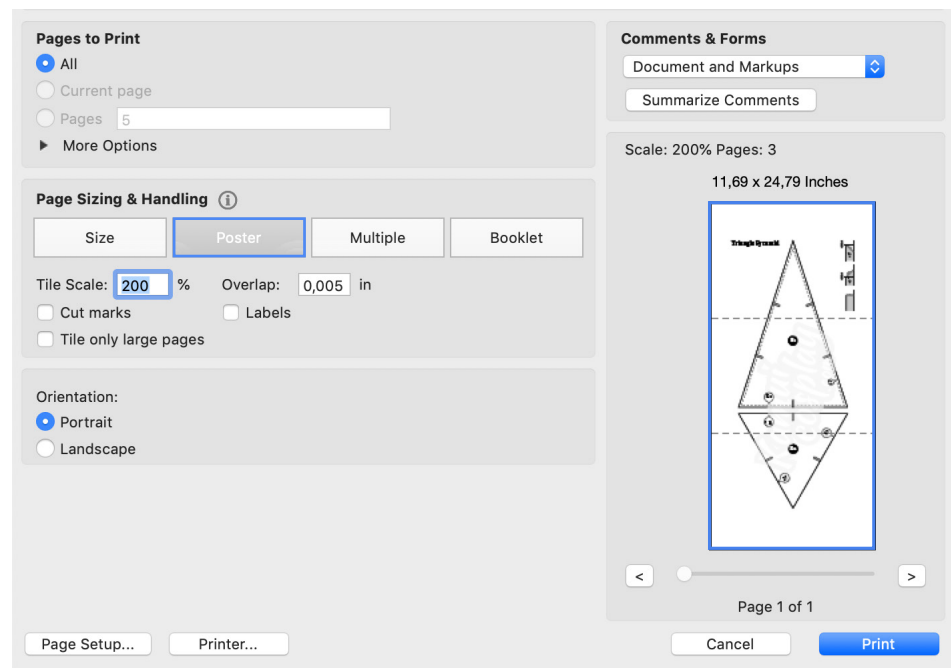

Over multiple pages:

If you set your scale too large you can see that your image would be cut off.

Instead select **“Poster Print”**.

Here you can set your **“Scale”** as large as you need and Acrobat will automatically split them over multiple printing pages.

Now you can easily print them out and tape them together.

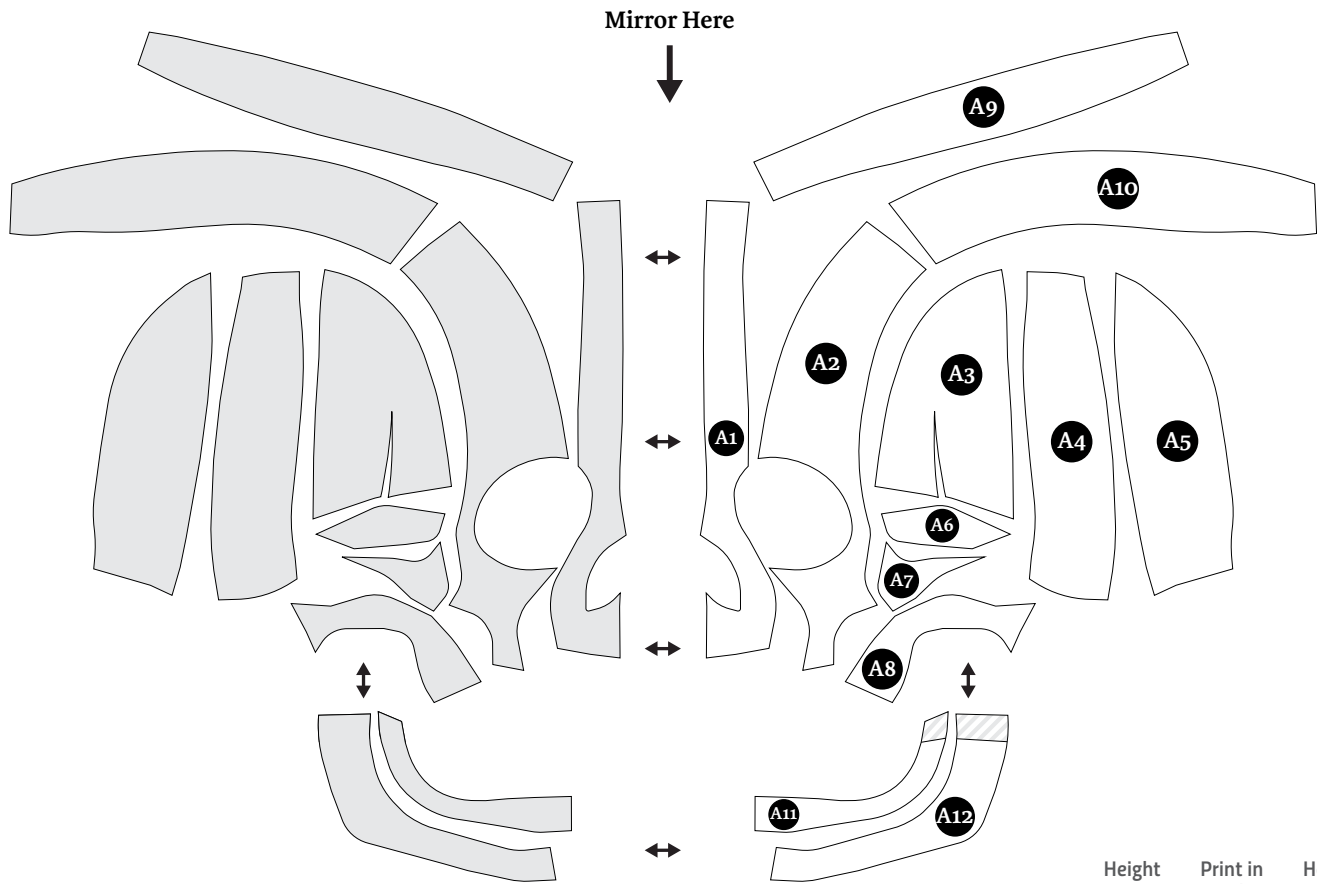

You will find scaling factors and the resulting heights on each individual shape page.
